

Samuvel Reegan

Full-Stack Developer

 +91 93455 32741  samuelreegan372@gmail.com  Dindigul, Tamil Nadu, India

 samuvelreegan.

SUMMARY

- Full-stack developer with **2+ years** of experience designing, building and shipping production web and mobile applications across the React, Node.js and Django stack.
- Owns features end to end — reusable component architecture, REST API design and integration, database modelling, AWS deployment, and post-release debugging and performance tuning.
- Works closely with backend engineers, designers and stakeholders to deliver stable, maintainable software on time.

SKILLS

- React.js
- React Native
- Node.js / Express.js
- RESTful API Design
- MySQL & MongoDB
- JavaScript (ES6+)
- Python
- AWS (EC2)
- Git & GitHub
- Bootstrap / CSS3

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Basicsbytes Infotech Pvt. Ltd.

 Jan 2025 – Present

- Develop cross-platform mobile applications with **React Native** for Android and iOS, delivering a shared library of reusable UI components used across multiple screens.
- Integrate RESTful APIs and manage application state, error handling and loading behaviour in coordination with backend engineers.
- Test, debug and profile release builds, reducing crashes and improving load times for a more stable end-user experience.

Full-Stack Developer | Phoenix

 2023 – 2025  Tamil Nadu, India

- Delivered template-based and fully custom web applications using **React.js**, **Node.js (Express)** and **Django**.
- Built reusable, responsive UI components and translated client designs into production-ready interfaces.
- Implemented and consumed REST APIs with token-based authentication, adapting architecture to each project's requirements.

EDUCATION

B.Sc. in Computer Science | Parvathy's Arts and Science College

 2020 – 2023  Dindigul, Tamil Nadu

PROJECTS

Properties Infinite – Real Estate Marketplace (Web & App) | Phoenix

📅 Nov 2023 – Feb 2024

Tech: React, React Native, Node.js, Express, MongoDB

- Built a real estate marketplace covering property discovery, buying, selling, renting and listing, delivered as both a web application and an Android app.
- Designed advanced filters for location, price, property type and size so users can narrow down searches quickly.
- Built an Admin Panel for managing users, properties, categories, locations, projects, listings and inquiries.
- Supported a free property posting option alongside structured buy, sell and rent workflows.

Arugan Coffee – E-commerce Website | Phoenix

📅 Jun 2024 – Jul 2024

Tech: React, Node.js, Express, MongoDB

- Built an e-commerce site for Arugan Coffee showcasing Arabica and Robusta beans, green coffee, filter coffee powder and chicory.
- Added product browsing, search, filtering and detailed product pages for a smoother shopping experience.
- Implemented shopping-cart and checkout functionality for seamless purchasing.
- Built an Admin Panel to manage products, categories, inventory, orders, customers and site content, with a dashboard for sales and traffic metrics.

Bizaltar – B2B Marketplace Web Application | Phoenix

📅 Jan 2025 – May 2025

Tech: React, Node.js, Express, MongoDB

- Built a full-stack marketplace application for showcasing and managing business products and services.
- Designed a responsive user-facing marketplace alongside an Admin Panel for platform data, users and listings.
- Implemented listing management, user management, category/content management, and search & browse functionality.
- Structured backend data models to keep listings and content management scalable as the platform grows.

SPAN – Order & Distributor Modules (Mobile Application) | Basicsbytes Infotech Pvt. Ltd.

📅 2025 – Present

Tech: React Native

- Worked on the Order and Distributor modules of SPAN, a pharmacy supply mobile app, building the order details, staging/placed order flows, and distributor listing and invite screens.
- Implemented deep-link handling for shared order links so recipients land directly on Order Details for that order — using the app if installed, or the matching web order page if not — with no intermediate redirect page.
- Built the distributor invite/share-link flow, calling the invite API and routing recipients straight to the correct distributor onboarding screen or web page.
- Parsed shared URLs to read order and distributor IDs, handled login-gated navigation for unauthenticated users, and loaded order summaries and product lists after landing on the screen.
